Montreal, QC — [alice@example.com](mailto:alice@example.com) — +1 514-555-0177 — [linkedin.com/in/alicewang](https://linkedin.com/in/alicewang)

## About Me

Fullstack engineer with 4 years building web apps with React, Node, and PostgreSQL.

## Core Competencies

- Python, JavaScript, TypeScript
- React, Node.js, FastAPI
- PostgreSQL, MongoDB
- Docker, AWS, CI/CD
- LLMs, RAG, LangChain

## Schooling

**BEng Software Engineering**  
McGill University 2015–2019

## Work History

**Fullstack Engineer**, Techfirm 2020–Present

- Built REST APIs with FastAPI and PostgreSQL serving 500K daily users.
- Migrated frontend from Vue to React, improving load time by 40%.
- Introduced Docker and CI/CD pipelines cutting release cycles from weekly to daily.

## Side Projects

**QueryBot** — RAG chatbot over internal Confluence docs using LangChain and AWS.

- Reduced support ticket volume by 25% after internal rollout.
- Deployed via Docker Compose with automatic model deployment updates.
